The 24-Hour Work Cycle

THE BENEFITS FOR CUSTOMERS

Our customers get the best of both worlds: A local North American company, with the global advantage of time compression and blended costs. We use our 50 years of steel detailing experience in the North American marketplace to operate and manage our own offshore offices.

Offshoring is required to be price competitive in today's marketplace; dealing with Dowco, you get the benefits of lower rates without the typical drawbacks associated with outsourcing. Dowco's 100% ownership of Dowco Consultants Philippines, Inc and Dowco Consultants India Private Limited, eliminate all associated risks and communication challenges in dealing with these companies.

Overlapping shifts in multiple time zones ensures that production is non-stop. At Dowco, one business day is 24 hours of production time. The concentric rings around the 24 hour clock illustrate the different shifts of our global operation.

Local Convenience

Established in Canada in 1970 and working primarily on North American projects ever since, Dowco sees ourselves as your Local Company in a global marketplace. Dowco gives our customers the ability to deal with a company in the Americas and leverage the power of the global economy to compress timelines and lower costs.

Global Power

Being located in four countries in four different timezones gives Dowco a 24-hour-a-day operation. Dowco is unique in that all companies are 100% internally owned, giving us full control over processes, priorities, and the entire operation. With over 240 Production staff, resources can be drawn on as needed to meet project deadlines. The scale of our technology allows for cloud sharing of models and real-time project data allowing all offices to collaborate seamlessly.
